

IBO – Austrian Institute for Building and Ecology (Ed.)

Details for Passive Houses: Renovation

A Catalogue of Ecologically Rated Constructions

Ecological refurbishment to passive house standard requires know-how and experience. For this reason, this book has been produced as a design tool which systematically covers existing solutions. Following the successful lead of the IBO's "Details for Passive Houses – A catalogue of ecologically rated constructions", examples relating to building physics, construction and ecology are presented with the help of full-color scale drawings of standard cross-sections and constructional details as well as numerous tables. These examples are organized by type and age of building and can easily be used as a basis for deriving individual solutions. The book is a must-have reference manual for designers and building owners who want to refurbish properties to a sustainable standard.

Published in German and English.

BIRKHÄUSER 2017, 312 pages, hardback, 440 color illustrations, 213 tables

German edition: hardback: ISBN 978-3-0356-0954-7, eBook: PDF ISBN 978-3-0356-0744-4
